活動的改善建議／發展空間

Suggested Improvement / Room for Development

The activity as a whole helped develop students' awareness of maintaining oral hygiene. However, teachers noted that certain activities did not allow students to fully experience and understand their significance (for example, using capsule toys to simulate snacking may not connect well with students' real-life experiences, making it difficult for them to understand this as representing the snacking process). If replaced with more concrete eating experiences, students would better comprehend the meaning behind these activities.
